did some extra work, but it is not conceded that they have any legal claim against the city. For information of bidders the City Engineer furnished a blue print showing what was supposed to be the bed of the river. The city contends that this was not guaranteed, but was for information only. When actual construction began, it was found that the old piers had not gone down to bedrock, and considerable excavation and concrete work not contemplated by the contractor had to be done in getting foundations. City Engineer Bolling has estimated the actual value of this work at about \$12,000.

Decause of the reported nature of some of the evidence, which it is said will be introduced during the hearing. Commonweaith's Attorney Sutton has said that he will make every effort to have the doors of the court barried to the general public. The lawyers for the defense will oppose this vigorously, it is said, but it appears probable that only accredited representatives of the only accredited representatives of the press will be admitted when the case is called. Attorneys for the prosecution and the defense have been working hard on the case, and it is believed that it will be hard follow. It will be hard fought from the outset

The whole matter has been referred.

The whole matter has been referred to Mayor Ainslie, and he may call a special session of the Common Council to appropriate funds to put the Fair Grounds, which is city property in condition for the troops. Unless the is done, the only alternatives are for the State to put in the sewer itself or to order the camp held at another point. Several sites, all of which are available without cost to the State are under advisement. If the encamp-ment is held elsewhere, the mobilization camp will not be held here, be-cause a camp large enough for the use of the troops in summer would be good enough for concentration pur

### Seed Potatoes FOR FALL CROP.

The planting of Seed Potatoes in June and July is increasing to a wonderful extent. A great many farmers claim that they give better crops planted at this time than they do when planted in the spring. Potatoes planted in June and July mature in the cool weather of the fall, at a time when they can be harvested to best advantage.

The Seed Potatoes we offer are put in cold storage early in the season, so as to keep in firstclass, vigorous condition.
